

Food & Beverage POS Application

The client is a food court located in a mall. Typically, a fast food counter that deals customer orders with rapidity and satisfaction. The food court is divided into two separate parts, but only one billing counter that operates on a manual billing and coupon system. They have been exploring ways to achieve a faster transaction rate in billing the orders.

Business Requirements

The need of the project was to automate the billing process by building an efficient POS application for faster transaction. The project focused on major features that include,

- ★ Mouse free operation
- ★ Keyboard Shortcuts to achieve multiple functionalities
- ★ Easy interface for quick invoicing
- ★ Fast reporting system
- ★ KOTs for individual kitchens
- ★ Serve more customers quickly

Our Solutions

Considering the need to be time-savvy, CGVAK came up with the following strategies. Search to buy option

- ★ Automated coupon based transaction.
- ★ User restriction from viewing the reports.
- ★ Automated stock entries, customer's account credit, and total cash collection.

Benefits

CGVAK succeeded in installing an effective and efficient POS system that helped them as follows,

- ★ Mouse free operation
- ★ Increased margins
- ★ Smart raw materials management
- ★ Tremendous decrease in the transaction time.

Tools & Technologies

VB.Net with WinForms, Visual Studio, MS SQL Server, Crystal Reports
