

Restaurant and Food Delivery Application

Client:

The client is a startup business aiming to provide services in food delivery and restaurant reservation in the digital platform to customers in the US.

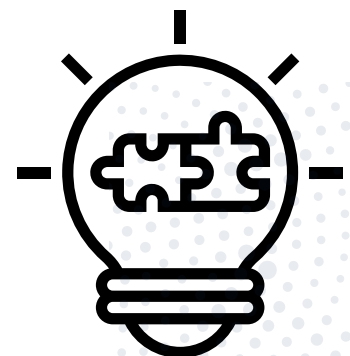

Business Challenge:

Our Client wanted a highly personalized and user-friendly restaurant and a food delivery app which allows

- Explore new restaurant availability through find nearby hotel
- Food availability which they like to dine
- Offers and discounts for each and every food
- Reserving their space by booking
- Food delivery at doorstep
- App with a secured digital payment gateway

Solution Delivered:

After analyzing their business challenges, our team proposed developing an app from scratch for the customer side and admin side of the app with incorporating latest technologies, unique features, secured and user-friendly for restaurant reservation and food delivery purpose.

Business Benefits:

Our restaurant reservation and food delivery app were able to achieve what the client asked for:

-  A web app with a user-friendly interface
-  Restaurant reserving and food delivery widget
-  "Find a nearby restaurant with hotel view" for reservation
-  List of filters with food menu
-  Reserving their space by booking
-  Offers and discounts for food which you like to dine
-  Food delivery with transparent details
-  Food order tracking and management
-  Secured Digital payment gateway
-  Enabled location service
