

Web app Development with React in Real Estate Business for Architects

Client: The client is a recognized real estate firm for architects and draftsmen located in the USA.

Business Challenge:

They have an existing system with old database storage and server. Since the client's business is getting improved, they would like to have a new system with the automation process. They were facing difficulties in meeting the client's requirements in planning the architecture for big areas, which made them think about whether to continue with the existing system or not. Their requirements for the new system are:

- Facilities for Bulk storage and maintenance.
- High Performance
- Seamless workflow
- Automation process
- And more...

Solution Delivered:

After a complete analysis of the client's requirements, we helped them move the project with our experts. We took a complete study and understood their existing system, business process, and demanding needs to be fulfilled. We helped them develop an application without collapsing the old database by securely moving to the new server, integrating with google API, the automation process for tracking from booking to payment, and more... we are happy to achieve the client's needs in a short period.

Business Benefits:

With the newly developed application, the client was super happy, and they were able to achieve such as:

- 📊 ·App with High performance.
 - 📄 ·Bulk storage and easy retrieving.
 - 🔧 ·Easy Maintenance
 - 🔄 ·Automation in tracking the end-to-end process.
 - 👁️ ·Highly customized visuals for clients' needs.
 - 🔒 ·Secured Payment Gateway.
 - 🖱️ ·Enriched UI/UX and able to work with a smooth flow.
 - 🗺️ ·Develops a basic plan with an automation process when comes to large-scale dimensions.
- And more...
